

Global has been one of the world's leading manufacturers of professional window films for many years. It is a market leader with its products in North America, Asia and across Europe. The classic **Global HP** dyed-metallized heat protection and insight protection window films, the premium **Global QDP Ceramic** series with extra heat protection and IR rejection films are **now available in Hungary**, as well as the Global IR Supreme. **Global IR Supreme** represents the highest level of automotive window film production. Its positive properties could be listed at length, the most important of which are its unparalleled heat protection and UV resistance. Moreover, thanks to durable dying technology, it won't show any signs of fading for many years.
